Mark the 6 letters [I I J B H C] in the CODE area of your scoring form.

Signature: [Blank]

Lecture 2
Quiz 2
Visions of the Universe

The skymap shows the location of the planets and stars for August, 1997. Only stars with magnitude brighter than 3.0 are shown. The map was generated by the program Cybersky. (For each statement below select the letter in the picture that best shows where this item is found.)

1. [2pt] Western Horizon D
4. [2pt] Ecliptic B
5. [2pt] Celestial Equator A
